EDUCATION

University of La Salette, Inc. — **Santiago City, Isabela**
Bachelor of Science in Information Technology — 2023 – Present

University of La Salette, Inc. — **Santiago City, Isabela**
Science, Technology, Engineering and Mathematics (STEM) — 2021 – 2023

University of La Salette, Inc. — **Santiago City, Isabela**
Junior High School Diploma — 2017 – 2021

PROJECTS

OBE Curriculum Management System — **Santiago City, Isabela**
Client Project, University of La Salette | Project Manager and Documentation — Oct 2026 – Present

- Building the university's Outcome-Based Education curriculum system with 6 user roles, a 7-step approval workflow from Program Head to Dean, CHED CMO and SDG coverage, drag-and-drop planning and attainment tracking.
- Flutter, FastAPI, PostgreSQL, Ollama, Docker, nginx. Added a local AI assistant (every suggestion human-reviewed and logged), about 90 API endpoints with 69 automated tests, Docker/HTTPS deployment and nightly backups.

SolarCORE: GIS-Based Solar Installation Tracking System — **Santiago City, Isabela**
Capstone Project (Team) | Lead Developer — 2026

- A GIS web app for a solar installation company to map, track and analyze its installation records.
- Led backend and frontend development with PHP, PostgreSQL/PostGIS, Leaflet.js and Chart.js, and integrated an AI chatbot.
- Project documentation: github.com/stfcrz11/SolarCORE_docs

Barangay Health Center Management System — **Bantug, Ramon, Isabela**
Academic Project (Team, Client-Based) | VB.NET

- A management system for the Barangay Bantug Health Center, built for a course requirement to find a real client and design a solution to its problem.
- Developed in VB.NET; source code at github.com/stfcrz11/vb.net-BarangayHealthCenterManagementSystem

Sili-Tubig Clash
Team Project (Team of Five) | Developer Support — Sep 2026

- Godot, GDScript, ENet and Python/NumPy. Cheat-resistant LAN multiplayer with host-validated actions, 4-digit lobby codes and a 45-second rejoin, builds for Windows, macOS and Android, and all sound effects generated from code.

Sili-Tubig: Task Avenue
Individual Project | Solo Developer — Sep 2026

- Godot, GDScript and ENet. A LAN trivia chase for 2 to 6 players in a maze styled like a Philippine city, with questions on Filipino culture, LAN game discovery, a solo mode against a pathfinding bot and a leaderboard; exported to Android.
- Source code: github.com/stfcrz11/CEREZO_SiliTubigClash_TaskAvenue

TODA Management System
Course Project | PHP, MySQL — Aug 2026

- A web app that shows passengers which tricycle drivers are available. Drivers set their own status, trips are logged automatically, and admins manage users, tricycles and trip history.
- PHP, MySQL, JavaScript and AJAX. Live demo: stfcrz11.github.io/TODA_Availability_WebAPP_ITE2
